Information regarding branding for your next project. Branding is defined as the process of coming up or making a unique name or design for a certain product.

Having a good brand strategy allows you to have a major advantage in gaining a large increase in your market competitions. Your brand tells your customers what they can expect from the products and services you offer.

Are you innovative or are you the experienced type? Do you offer a high-cost, high-quality product, or a low-cost, high-value product? It's impossible to be both. You should consider thinking what your customers need you to be. Your logo is the main foundation of your brand. All the promotional materials should be connected with your logo to communicate with your brand.

Brand messages are delivered and planned based on the questions how, what, when, to whom and where your brand strategy is. Advertisement, visual communication, and distribution channels are parts of brand strategy.

The branding strategy you have should be consistent as it leads to a strong brand equity.
